NOTICE OF SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT

Puget Sound Energy has submitted a Notice of Construction (NOC) application to the Puget Sound Clean Air Agency (Agency) for the Tacoma Liquefied Natural Gas (LNG) facility ("project"). On November 9, 2015, the City of Tacoma issued the “Puget Sound Energy proposed Tacoma Liquefied Natural Gas Project Final Environmental Impact Statement” (FEIS). The Agency has determined a Supplemental Environmental Impact Statement (SEIS) is required to identify and analyze greenhouse gas (GHG) emissions and impacts for the project.

The SEIS will supplement the Air and Cumulative Impacts sections related to GHGs in the City of Tacoma’s FEIS. Reasons include: Section 3.2 of the FEIS relies upon a guidance document by Department of Ecology for identification and evaluation of GHGs which currently has been removed by Ecology from its website for revision and portions of § 3.13 of the FEIS rely upon the GHG analyses from § 3.2. The FEIS’ GHG analysis included a quantitative analysis of GHGs on the project site and some qualitative analysis of the use of LNG produced. The SEIS will supplement the Air and Cumulative Impacts sections of the FEIS related to GHGs to include quantitative analysis of the emissions throughout the fuel life cycle.

There will be no optional scoping for this SEIS.

**Project Name:** Tacoma Liquefied Natural Gas Project
(including TOTE Marine Vessel LNG Fueling System)

**Project Proponent:** Puget Sound Energy

**Location of Project:** E 11th Street, Tacoma, WA

**Next Steps:** Pursuant to Agency Regulation I, Article 2, the Agency will hire a consultant to prepare the SEIS. Public comment will be provided pursuant to the requirements of SEPA for the draft SEIS.

**Responsible Official / Contact Person:** Carole Cenci, Manager – Compliance
