

ELECTRIC VEHICLES

Electric vehicles (EVs) are cars fueled by electricity stored in a rechargeable battery.

Saves money

Electricity is cheaper than gas. In Washington, driving electric only costs 2-3 cents per mile.

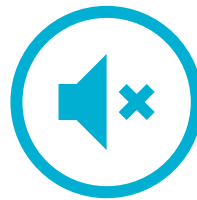

No tailpipe pollution

Electric vehicles don't even have tailpipes! EVs produce zero climate or toxic air pollution.

Less maintenance

Electric engines have fewer moving parts so they don't need oil changes or other maintenance.

Quiet drive

Electric vehicles make much less noise than gas cars, no matter how fast you go.

What's the difference between an electric vehicle and a hybrid?

BATTERY ELECTRIC VEHICLE (BEV)

all-electric

large battery

needs to be plugged in

example: Nissan LEAF

PLUG-IN HYBRID VEHICLE (PHEV)

electric with a gas backup

medium-sized battery

can be plugged in

example: Honda Clarity

HYBRID VEHICLE

gas

small battery

can't be plugged in

example: Toyota Prius
