

Testing Date:	
Station Name:	
Address:	

ATTENTION OWNER/OPERATOR:

Please be advised that this station's vapor recovery system has **FAILED** the following compliance test(s):

- ☐ Static Pressure Decay
- ☐ Dynamic Back Pressure
- ☐ Air-to-Liquid Ratio
- ☐ Tank-Tie Test
- ☐ Static Torque of Adaptors

All gas stations in the Puget Sound region are required to pass the above compliance tests so that gasoline vapors stay out of the air and more gasoline stays in station storage tanks.

INSTRUCTIONS:

Repair the defective equipment identified in the attached testing report, then retest the vapor recovery system.

If the repair(s) cannot be made by the next business day, _____, then the gas station owner or operator must stop receiving and/or dispensing gasoline from the defective equipment. Continuing to operate defective equipment beyond the next business day can result in a civil penalty of \$1,000 per day in operation. The equipment must remain out of operation until the vapor recovery system is retested and passes all required compliance testing. For more information on Regulation II, Section 2.07(e)(3), go to www.pscleanair.org/gasstations.

If you have questions, please contact Kim Cole at kimc@pscleanair.org or 206.689.4020.
