DETERMINATION OF NONSIGNIFICANCE

Description of Proposal

The Puget Sound Clean Air Agency proposes a General Order of Approval for coffee roasters with a capacity of less than 26.5 pounds per batch. If a final General Order is approved for use, eligible businesses may submit applications requesting coverage under the terms of the General Order of Approval. This proposal is intended to provide streamlined permit processing for sources which meet the requirements to apply for coverage. If the applicability criteria for a General Order of Approval have been met, the specific approval conditions will have already been established through this process. Coffee roasters that qualify for the General Order of Approval must employ a thermal oxidizer or catalytic oxidizer to control emissions of volatile organic compounds, toxic air pollutants, and odors from both the roaster and the cooling tray. Roasters that meet the applicability criteria for coverage under this proposed General Order of Approval and comply with the specific approval conditions are not expected to produce adverse or nuisance impacts offsite.

Lead Agency

Puget Sound Clean Air Agency

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

The Agency is accepting comments on the DNS through April 11, 2022.

We have identified and adopted this document as being appropriate for this proposal after independent review. The document meets our environmental review needs for the current proposal and will accompany the proposal to the decision-maker.
