## DETERMINATION OF NONSIGNIFICANCE

### Description of Proposal

Fluid Motion fabricates fiberglass boats in two lamination buildings: Building 2 and Building 3. The boats range from 25-45 feet and are manually fabricated with open molds. Gel coat resin, vinyl ester ~~and~~ polyester resins are applied to the molds to produce hulls, decks, and small parts. Upholstery and wood fixtures are also assembled at the facility. The proposed Order would remove existing facility-wide emission limits established in PSCAA Order of Approval 10761 and Order of Approval 11711, which cancelled and superseded 10761. The proposed Order would establish Fluid Motion as a Title V Air Operating Permit source.

The emissions associated with this project were evaluated and could total up to 58.7 tons/year styrene, 4.32 tons/year of methyl methacrylate and 63.2 tons/year of volatile organic compound (VOC). The 63.2 tons/year total VOC includes the styrene and methyl methacrylate emissions as well as 0.08 tons/year n-Hexane and 0.03 tons/year of toluene. Each of the chemicals contributing to the total of 63.2 tons/year VOC are also classified as Toxic Air Contaminants (TACs).

### Proponent

**Fluid Motion, LLC**  
17939 59th Ave NE  
Arlington WA, 98223

### Location of proposal, including street address if any

**Fluid Motion, LLC, 17939 59th Ave NE, Arlington WA, 98223**

### Lead Agency

**Puget Sound Clean Air Agency**

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

**The Agency is accepting comments on the DNS through May 21, 2022.**

We have identified and adopted this document as being appropriate for this proposal after independent review. The document meets our environmental review needs for the current proposal and will accompany the proposal to the decision-maker.
