STAGE 1 BURN BAN CALLED FOR SNOHOMISH COUNTY

Use of fireplaces and uncertified wood stoves is prohibited until air quality improves

SEATTLE, WA – Due to stagnant weather conditions and rising air pollution, the Puget Sound Clean Air Agency is issuing a **Stage 1 burn ban for Snohomish County, effective at 2 p.m. today, November 25, 2023.**

This ban is in effect until further notice.

“There were high levels of wood smoke last night and early morning today in Snohomish County. And, while there will be some clearing during the day, we expect high levels again tonight. This could lead to daily values of UNHEALTHY FOR SENSITIVE GROUPS in those areas and MODERATE air quality overall. Stagnant conditions are expected to persist through the weekend and into next week.”

The Clean Air Agency will continue to closely monitor the situation.

The purpose of a burn ban is to reduce the amount of pollution creating unhealthy air, usually due to excessive wood smoke. Wood smoke affects the respiratory and cardiovascular systems and increase health risks, especially for sensitive populations.

During a Stage 1 burn ban:

- No burning is allowed in wood-burning fireplaces, uncertified wood stoves or fireplace inserts. Residents should rely instead on their home’s other, cleaner source of heat (such as their furnace or electric baseboard heaters) for a few days until air quality improves, the public health risk diminishes, and the ban is cancelled.
- It is OK to use certified wood stoves or inserts, pellet stoves, and natural gas or propane stoves or inserts.

- The only other exception is if the homeowner has a previously approved 'No Other Adequate Source of Heat' exemption from the Puget Sound Clean Air Agency.
- No outdoor fires are allowed. This includes recreational fires such as bonfires, campfires and the use of fire pits and chimineas.
- Burn ban violations are subject to a \$1,000 penalty.

The Washington State Department of Health recommends that people who are sensitive to air pollution limit time spent outdoors, especially when exercising. Air pollution can trigger asthma attacks, cause difficulty breathing, and make lung and heart problems worse, including COVID-19. Smoke is full of small particles, which can be especially dangerous for sensitive groups — infants, children, and people over 65, or those who are pregnant, have heart or lung diseases (such as asthma or COPD), respiratory infections, diabetes, stroke survivors, or are suffering from COVID-19.

#

The Puget Sound Clean Air Agency is an air quality management agency serving King, Kitsap, Pierce and Snohomish counties. Created as a result of the 1967 Washington Clean Air Act, the agency protects public health by adopting and enforcing air quality regulations, educating individuals and businesses about clean-air choices and sponsoring voluntary initiatives to improve air quality.

The Agency fully complies with Title VI of the Civil Rights Act of 1964 and does not discriminate based on race, color, sex, or national origin in its programs and activities. In addition, the Agency also assures non-discrimination on the basis of creed, religion, gender identity, sexual orientation, age, disability, marital, or veteran status. For more information, or to submit a title VI Complaint, go to www.pscleanair.gov or call (206) 343-8800.
