

1

00:01:20.580 --> 00:01:28.390

John Dawson: Good afternoon my name is John Dawson, and I am the engineering manager at Puget Sound Clean Air Agency.

2

00:01:28.580 --> 00:01:36.639

John Dawson: This is the public hearing for draft order of approval. Number 1, 1, 5, 7, 3 for Cedar Grove, Maple Valley.

3

00:01:37.050 --> 00:01:39.330

John Dawson: This hearing is being recorded.

4

00:01:39.510 --> 00:01:43.079

John Dawson: The draft order of approval has several components.

5

00:01:43.520 --> 00:02:03.349

John Dawson: First, st changes to the monitoring requirements on biofilters at the facility to focus only on the variables that the agency has determined are indicative of proper performance and to add new requirements for what happens when biofilter temperatures go outside acceptable ranges

6

00:02:04.210 --> 00:02:09.820

John Dawson: second. There's a the draft permit includes a decrease in the frequency of

7

00:02:10.050 --> 00:02:18.290

John Dawson: required 3rd party biofilter evaluations while adding new additional requirements for

8

00:02:19.116 --> 00:02:25.549

John Dawson: for when these evaluations show biofilter parameters going outside of acceptable ranges

9

00:02:26.270 --> 00:02:50.629

John Dawson: additionally the draft permit allows for the second bay door of the tipping building to remain open more than was previously allowed, but also adds requirements regarding the storage of materials in the tipping, building and limits visible emissions from the tipping building also changes the tipping, building, capture, compliance, method.

10

00:02:50.630 --> 00:02:59.089

John Dawson: demonstration away from a smoke test and to a verification of proper adequate airflow through the tipping building.

11

00:02:59.210 --> 00:03:02.829

John Dawson: And then, finally, it includes the replacement of a grinder.

12

00:03:03.210 --> 00:03:13.040

John Dawson: The draft permit the agency's reasoning behind these changes and the supporting materials are all available on the agency's website.

13

00:03:13.550 --> 00:03:16.920

John Dawson: You may also submit comments

14

00:03:17.590 --> 00:03:25.579

John Dawson: by email to the agency at [public.comment@pscleanair.gov](mailto:public.comment@pscleanair.gov).

15

00:03:25.740 --> 00:03:30.010

John Dawson: By January 31st at 4 30 Pm.

16

00:03:30.869 --> 00:03:37.339

John Dawson: This hearing is one way of one way to submit comments on the draft order of approval.

17

00:03:37.740 --> 00:03:43.480

John Dawson: Now in just a minute we'll begin the public comment portion of the hearing.

18

00:03:43.610 --> 00:03:52.600

John Dawson: If you would like to make a comment, please use the raise hand function in zoom, and then I'll recognize speakers one at a time.

19

00:03:52.820 --> 00:04:09.359

John Dawson: Please limit your comments to no more than 5Â min. Also this hearing will extend all the way to 6 Pm. If we run out of speakers before then, then we will go into a break of approximately 20Â min.

20

00:04:09.620 --> 00:04:20.930

John Dawson: and then we will check to see if any new speakers have arrived. Just give me one moment to prepare, and then I will call on speakers with their hands raised.

21

00:04:32.860 --> 00:04:36.419

John Dawson: We have a hand raised by Sriram Baya.

22

00:04:36.972 --> 00:04:43.989

John Dawson: Sriram, if you're ready, may feel free to unmute yourself and begin speaking. Begin your comment.

23

00:04:44.820 --> 00:04:48.019

Sriram Bhaiya: Alright, great so! And how much time do I have.

24

00:04:48.686 --> 00:04:51.299

John Dawson: You can. You have up to 5Â min.

25

00:04:51.300 --> 00:05:02.341

Sriram Bhaiya: Okay, perfect. So yeah, I stay in the on the Isoka Hobart road a little bit you know, from away from Cedar Grove. facility.

26

00:05:02.750 --> 00:05:22.279

Sriram Bhaiya: you know a few comments here. There's nothing non-significant regarding the compost operations that have not significantly impacted and directly affected the surrounding property owners. I'm 1 of the surrounding property owners and by Washington State statute. Offensive orders are not to travel beyond a property owner's property line.

27

00:05:22.440 --> 00:05:33.570

Sriram Bhaiya: and by firsthand experience. We. We experience odor all the time. We have kids who want to go play outside, and they are not able to do that most of the time, because of the odor.

28

00:05:33.670 --> 00:06:00.349

Sriram Bhaiya: I see all the numbers and microns, etc. But I would really urge whoever is looking at this, to actually come to the properties and smell the air when the operations are happening at the cedar grove. Compost facility, and it's not bearable. It's not possible for us to go out. So when this is the current condition to see that some of the things are being relaxed and and the emissions are actually going up is not acceptable.

29

00:06:00.590 --> 00:06:24.780

Sriram Bhaiya: The majority of the land surrounding Cedar Grove compost is medium density, residential properties of quarter acres or more elementary school Maple Hills elementary school is located one and a half mile west of the Cgc. Facility. And then all the residential communities have been adversely affected and impacted. You know, you know, because of this facility.

30

00:06:24.820 --> 00:06:32.759

Sriram Bhaiya: And you know, since 1997 the compost facilities has continued to allow offensive odors to travel several miles.

31

00:06:32.780 --> 00:06:49.989

Sriram Bhaiya: you know, in 2,001 they settled a class action lawsuit in 2018. Again, they settled the class action lawsuit of Avila versus 0 groove composting, and, you know, removal of continuous monitoring of biofiltering operations

32

00:06:49.990 --> 00:07:08.910

Sriram Bhaiya: is like giving an open license for the composting facility to to break the clean air statutes. Again, the actual experience of the residents living in the area. That is what should be should be looked into, and also the composting facility is requesting the reduction of monitoring frequency.

33

00:07:09.230 --> 00:07:18.090

Sriram Bhaiya: I'm not sure like if the current situation itself is not acceptable, how can we increase the monitoring frequency from 30 days to 60 days?

34

00:07:18.470 --> 00:07:34.060

Sriram Bhaiya: So again, for decades, the facility has actively demonstrated that it cannot monitor and police its operations to prevent odors from traveling off its property. The current things that are in the current measures are that are in place are itself not enough.

35

00:07:34.280 --> 00:07:48.049

Sriram Bhaiya: So you know the need, for you know on-site monitoring needs to be actually improved and not relaxed. So the proposed changes should not be approved. The 3rd party evaluation should not be reduced from 3 months to 6 months.

36

00:07:49.190 --> 00:08:09.350

Sriram Bhaiya: and all these requirements of removing the bay door when the operations are happening again. The current, you know, odor itself is unacceptable, so I'm not sure why some of these things are being accepted, and odor. Neutralizing spray is not a substitute for this.

37

00:08:09.420 --> 00:08:37.669

Sriram Bhaiya: you know. So so these are like some of the some of the things. So in conclusion, like, we really need to test the orders in the residential properties. We need to look at what kind of codes they are violating. And we should actually do a study to improve how such odor needs to be controlled. Even further, leave aside like this this change which will actually make the situation even worse. So thank you for the time.

38

00:08:41.720 --> 00:08:43.590

John Dawson: Thank you for your comments.

39

00:08:46.360 --> 00:08:52.810

John Dawson: Do we have anyone else? If anybody else would like to make a comment feel free to

40

00:08:53.150 --> 00:09:00.620

John Dawson: use the the raise hand function in zoom, and then I'll I'll recognize commenters one at a time.

41

00:09:31.350 --> 00:09:34.280

John Dawson: Is there anybody wishing to make a comment

42

00:09:45.010 --> 00:09:53.650

John Dawson: right at this time. It looks like we have no other commenters currently in the meeting. So we will temporarily take a break.

43

00:09:53.760 --> 00:10:01.179

John Dawson: We'll go into a break until 4 30 Pm. And then we will continue at 4 30.

44

00:10:19.120 --> 00:10:24.300

John Dawson: It's now 4, 30. Welcome back to the public. Hearing

45

00:10:24.650 --> 00:10:33.790

John Dawson: on Puget sound, clean Air Agency proposed order of approval. Number 1, 1, 5, 7, 3 for Cedar Grove, Maple Valley.

46

00:10:34.260 --> 00:10:40.409

John Dawson: If anybody here has a comment they would like to make on the draft permit.

47

00:10:40.560 --> 00:10:46.680

John Dawson: Please use the raise hand function in zoom, and then I will call on people one by one.

48

00:11:09.200 --> 00:11:12.195

John Dawson: At this point there are no hands raised.

49

00:11:12.740 --> 00:11:20.320

John Dawson: let's try this. If anybody would like to make a comment, feel free to simply unmute and deliver your comment. Now.

50

00:11:32.410 --> 00:11:33.090

Anne Newcomb she/her/hers: Hi.

51

00:11:34.320 --> 00:11:35.839

Anne Newcomb she/her/hers: My name is Anne Newcomb.

52

00:11:36.360 --> 00:11:38.310

Anne Newcomb she/her/hers: Thanks for taking our comments.

53

00:11:40.105 --> 00:11:49.450

Anne Newcomb she/her/hers: I have lived at 1, 6, 6, 5, 0 2, 46. Place southeast in Issaquah, or

54

00:11:50.560 --> 00:11:55.570

Anne Newcomb she/her/hers: since 1991, and have experienced

55

00:11:56.860 --> 00:12:00.450

Anne Newcomb she/her/hers: the strong order of Cedar Grove off and on.

56

00:12:00.710 --> 00:12:16.172

Anne Newcomb she/her/hers: But I believe it was the last lawsuit that brought things down and haven't really been experienced. The odor experiencing the odor much in the past few years, although I have been noticing it lately and

57

00:12:17.620 --> 00:12:21.440

Anne Newcomb she/her/hers: this today even went out onto my deck and

58

00:12:21.560 --> 00:12:28.280

Anne Newcomb she/her/hers: smelled it really strongly around 1230 pm. So

59

00:12:28.790 --> 00:12:31.069

Anne Newcomb she/her/hers: when it was at its worst.

60

00:12:32.217 --> 00:12:37.579

Anne Newcomb she/her/hers: if if our windows were open, or if I went outside.

61

00:12:38.180 --> 00:12:42.020

Anne Newcomb she/her/hers: or if we were outside, my husband and I would

62

00:12:42.310 --> 00:12:50.230

Anne Newcomb she/her/hers: have to come inside and shut the windows because we would get ill. We felt got headaches and nausea

63

00:12:50.460 --> 00:12:53.050

Anne Newcomb she/her/hers: and some dizziness.

64

00:12:53.640 --> 00:13:01.129

Anne Newcomb she/her/hers: So it's a pretty serious, a serious subject for us, so that

65

00:13:01.970 --> 00:13:05.955

Anne Newcomb she/her/hers: cedar grove composting is thinking about.

66

00:13:07.880 --> 00:13:14.039

Anne Newcomb she/her/hers: putting more emissions into the air is kind of mind blowing to me that they want to loosen.

67

00:13:14.160 --> 00:13:23.779

Anne Newcomb she/her/hers: are asking to loosen their monitoring and restrictions. So one thing that popped out to me that was in your notice is that

68

00:13:26.720 --> 00:13:27.680

Anne Newcomb she/her/hers: a.

69

00:13:28.570 --> 00:13:34.719

Anne Newcomb she/her/hers: The estimated potential emission increase associated with the change in method of operation of the tip.

70

00:13:34.980 --> 00:13:40.150

Anne Newcomb she/her/hers: A tipping building is 1 point or 8.4 tons

71

00:13:40.280 --> 00:13:45.359

Anne Newcomb she/her/hers: a year of vocs and point 7 tons a year of ammonia.

72

00:13:46.430 --> 00:13:53.560

Anne Newcomb she/her/hers: This is very concerning for my husband and I, and I'm sure our neighbors. So we are really hoping

73

00:13:53.670 --> 00:13:57.513

Anne Newcomb she/her/hers: that the Clean Air air agency is going to

74

00:13:58.910 --> 00:14:01.380

Anne Newcomb she/her/hers: keep our air clean and safe to breathe.

75

00:14:01.760 --> 00:14:05.930

Anne Newcomb she/her/hers: And also, I think, as you know, Washington State

76

00:14:06.600 --> 00:14:12.830

Anne Newcomb she/her/hers: statute states that offensive odors are not to travel beyond a property owner's property line.

77

00:14:13.300 --> 00:14:21.879

Anne Newcomb she/her/hers: We live about 2 miles away from Cedar Grove, composting as the crow flies, and there are hundreds of other homes in the area.

78

00:14:22.040 --> 00:14:24.489

Anne Newcomb she/her/hers: They've experienced the smell as well.

79

00:14:25.280 --> 00:14:36.000

Anne Newcomb she/her/hers: Cedar grove composting air pollution, negative negatively affects our health and well-being and our property values. So that's a big deal is that if

80

00:14:37.000 --> 00:14:42.319

Anne Newcomb she/her/hers: if the smell continues and gets worse.

81

00:14:42.560 --> 00:14:54.910

Anne Newcomb she/her/hers: then it's it's definitely going to negatively affect our property values, because nobody wants to live in an area where not just the smell is bad, but they could get sick from it. And we don't really know

82

00:14:55.832 --> 00:14:58.790

Anne Newcomb she/her/hers: like we're learning more about the

83

00:14:59.993 --> 00:15:02.910

Anne Newcomb she/her/hers: particles that come from Wildfire.

84

00:15:03.060 --> 00:15:11.319

Anne Newcomb she/her/hers: And I think, as we learn more about that, we're probably going to learn more about the particles and emissions that are coming from

85

00:15:12.110 --> 00:15:18.290

Anne Newcomb she/her/hers: composting, which I am a huge proponent of. We do a lot of composting here.

86

00:15:18.420 --> 00:15:24.790

Anne Newcomb she/her/hers: but Cedar Grove just really needs to keep up.

87

00:15:26.420 --> 00:15:35.459

Anne Newcomb she/her/hers: you know, with all of their filters, so they can be good neighbors. Thank you so much for all of your great work that you've done really appreciate it hadn't planned on commenting

88

00:15:35.904 --> 00:15:41.100

Anne Newcomb she/her/hers: tonight. But since nobody else is there you go. Thank you so much. Appreciate it.

89

00:15:53.360 --> 00:16:01.100

John Dawson: Alright, thank you, and if we have any other commenters, please feel free to unmute and deliver your comment.

90

00:16:04.170 --> 00:16:05.459

charlesnevi: Can you hear me?

91

00:16:06.390 --> 00:16:07.760

John Dawson: Yes, yes, I hear you.

92

00:16:07.760 --> 00:16:10.429

charlesnevi: Hey? My! My name's Charles Nevi.

93

00:16:10.540 --> 00:16:15.509

charlesnevi: I live 1, 4, 8, 4, 9, 200 and 4th Avenue, southeast in Renton.

94

00:16:15.710 --> 00:16:18.420

charlesnevi: and I'd just like to say the lady who just spoke.

95

00:16:18.770 --> 00:16:43.189

charlesnevi: I hope you listen to what she had to say. She said it very well, as I said in a note to you. If this stench were to enter the rooms that you guys are in, you would adjourn the meeting. You would not put up with it. And yet you're asking us to put up with it every day. And it's just it's just unbelievable that you're doing this.

96

00:16:43.740 --> 00:16:44.770

charlesnevi: Thank you.

97

00:16:50.910 --> 00:16:52.299

John Dawson: Hey? Thank you, Charles.

98

00:17:01.800 --> 00:17:06.239

John Dawson: somebody else would like to comment. Please feel free to unmute yourself.

99

00:17:25.750 --> 00:17:28.210

John Dawson: Do we have any other commenters?

100

00:17:41.950 --> 00:17:50.029

John Dawson: It appears that is all the commenters we have for now. So we will go into a break until 5 o'clock

101

00:18:08.470 --> 00:18:13.540

John Dawson: is now 5 0. 1. Welcome back to the public hearing

102

00:18:13.860 --> 00:18:20.529

John Dawson: on proposed order of approval. Number 1, 1, 5, 7, 3 for Cedar Grove, Maple Valley.

103

00:18:23.707 --> 00:18:34.440

John Dawson: If anybody has joined and would like to make a comment on the draft order of approval, feel free to unmute yourself and deliver your comment. Now.

104

00:18:37.560 --> 00:18:39.150

KG: Hi, John! Can you hear me?

105

00:18:39.490 --> 00:18:40.740

John Dawson: Yes, I hear you.

106

00:18:40.740 --> 00:18:53.119

KG: Perfect. Hi, John! My name is Kasia Grisbeck. 1st of all, thank you to you, John, and to the Puget sound clean Air Agency for organizing this meeting, and really for taking the time to listen to our comments.

107

00:18:53.470 --> 00:18:58.930

KG: So I, I live at 1, 2, 9, 0 3, 229th Avenue, southeast in Issaquah, which is about

108

00:18:59.130 --> 00:19:14.219

KG: 2 miles or so north of the Cedar Grove facility. I like to think of myself as an avid composter, and I totally, wholeheartedly support the act of composting when it's being done correctly, and when it's being done respectfully, I should say.

109

00:19:14.220 --> 00:19:39.480

KG: and I guess I'll start with a general comment, and that is, to be quite frank, I really do think that this meeting should be about mitigating the current air emissions coming from Cedar Grove and not talking about adding to those emissions. I don't think I need to say this, but access to clean air is a basic human right, and it is a right that I think the neighboring community, and not to mention the neighboring elementary school, are consistently deprived of.

110

00:19:40.200 --> 00:20:08.500

KG: So I'm deeply concerned about these proposed modifications. To put it lightly, these changes raise significant environmental and community health issues that weren't careful scrutiny. And it's scrutiny that I worry really hasn't been employed here. The permit proposes a reduction in monitoring frequency, as I understand it, for a facility that, again, as I understand, is often in violation of their current permits. And if that's the case, I really

111

00:20:08.500 --> 00:20:13.229

KG: fail to see how this is a reasonable or even a logical request. At that

112

00:20:13.920 --> 00:20:33.499

KG: the Department also proposes to open the second bay door during operations which to me seems to prioritize operational convenience of the facility over environmental protection over public health. Despite the employment of any type of best available current technology like spray curtains or biofilter media.

113

00:20:34.770 --> 00:20:55.360

KG: The environmental impact determination of non-significance appears really premature. The aggregated environmental impacts of these operational changes, including the increased emissions, the reduced monitoring, I don't think, have been adequately addressed. And I wonder what sort of detailed environmental review supports this determination of non-significance and and I'll end with saying that

114

00:20:55.650 --> 00:21:12.120

KG: the request being made in this permit and your agency's responses really raised many questions that I would like to ask. I'm kind of new to these venues to be totally honest with you, John, and I wonder if this is the proper venue to be able to ask these questions and get these answers.

115

00:21:15.590 --> 00:21:25.949

John Dawson: Well, you can feel free to ask questions. We won't be able to respond here in the moment, but we will respond. When we respond to all the comments in general in the coming weeks.

116

00:21:26.280 --> 00:21:31.883

KG: Okay? Well, then, I have a. I have a list of questions that I guess I will just read out now.

117

00:21:32.710 --> 00:22:00.599

KG: and I guess, await your response. So one of the 1st questions I have is about air quality modeling. And I wonder if any type of modeling has been done to properly assess these proposed changes the public notice mentions increases in vocs and in ammonia. I don't see much about odor there, and so I'm wondering if the agency has modeled odor impact associated with these changes, and if not, I wonder why not?

118

00:22:01.210 --> 00:22:27.119

KG: I wonder why as well that it is not being required to Cedar Grove to install the curtain and the 12 inches of biofilter. Why, it's an either, or situation at least that's what it seems like to me, after reading this notice, I wonder what it means that the biofilter will only be used on surfaces of the feedstock pile accessible by the front loader. So essentially. How much would that biofilter be covering?

119

00:22:27.380 --> 00:22:38.649

KG: And I wonder how much the curtain and or the biofilter would actually reduce the odor and the voc emissions? I would really want to see some quantitative data related to that

120

00:22:38.890 --> 00:23:06.610

KG: with respect kind of more generally to odor complaints filed with your agency. I wonder how your agency handles odor complaints. I wonder if you investigate odor complaints, and to what extent I wonder how odor is measured, how it's quantified. I wonder if there's a database of these complaints, and I wonder if over time the complaints have been trending up or down. I wonder if there's a database of odor measurements. If maybe there's like a data dashboard to monitor monitor some of these clean air complaints.

121

00:23:06.930 --> 00:23:15.960

KG: I wonder what is used to measure odor? Is it field Ulfectometers, nasal rangers, those sorts of those types of equipment.

122

00:23:16.320 --> 00:23:25.879

KG: And I wonder if the Fidel method is employed when any type of odor measurements are done. So essentially frequency, intensity, duration, offensiveness, location.

123

00:23:26.170 --> 00:23:52.349

KG: and in terms of current air quality monitoring around Cedar Grove. I have a lot of questions as well. I wonder what type of air quality monitoring is being done. I wonder how often air quality is being monitored around Cedar Grove. What sorts of constituents are monitored during any type of monitoring events. Is there a database that's publicly available? Where is the monitoring being done? How far from the facility is being monitored?

124

00:23:52.370 --> 00:24:03.230

KG: And then I guess the last question I'll end on is, what type of transparency and community involvement besides these types of meetings can your agency provide?

125

00:24:04.610 --> 00:24:06.495

KG: Do you get all that, John.

126

00:24:07.700 --> 00:24:12.379

John Dawson: We are recording. So I my hope is that the the recording got all that.

127

00:24:12.890 --> 00:24:23.019

KG: Okay, well, thank you for your time, like, I said. And as I started, I really appreciate you all taking our comments and really hope we can work together to reach a resolution that makes everyone happy.

128

00:24:24.830 --> 00:24:26.110

John Dawson: Thank you, Kasha.

129

00:24:35.060 --> 00:24:40.520

John Dawson: If we have another commenter, feel free to unmute yourself and deliver your comment.

130

00:24:51.560 --> 00:24:53.450

charlesnevi: Yeah, I commented earlier.

131

00:24:54.690 --> 00:24:58.150

charlesnevi: I just like to make a comment about a couple of the minutes

132

00:24:58.300 --> 00:25:10.150

charlesnevi: one woman mentioned that she had her windows open, which really surprised me. We never open our windows winter, summer, day, or night. The stench is just too unpleasant

133

00:25:10.280 --> 00:25:13.919

charlesnevi: to have it be inside the house.

134

00:25:14.410 --> 00:25:16.619

charlesnevi: The second thing that was mentioned was.

135

00:25:17.300 --> 00:25:23.709

charlesnevi: there was improvement after the lawsuit in 2016, which indicates that

136

00:25:24.020 --> 00:25:33.329

charlesnevi: Cedar Grove can do something about the stench. They just don't want to, and it also tends to indicate. The only thing they respond to

137

00:25:33.580 --> 00:25:35.260

charlesnevi: is lawsuits.

138

00:25:36.110 --> 00:25:37.140

charlesnevi: Thank you.

139

00:25:48.070 --> 00:25:49.009

John Dawson: Thank you, Charles.

140

00:25:56.590 --> 00:25:58.440

John Dawson: Do we have another commenter

141

00:26:25.720 --> 00:26:34.099

John Dawson: that appears to be all the commenters we have for now. So we will go into a break until 5 30.

142

00:26:44.660 --> 00:26:55.890

John Dawson: It's now 5, 30. Welcome back to the public. Hearing on proposed order of approval. 1, 1, 5, 7, 3 for Cedar Grove Maple Valley.

143

00:26:57.490 --> 00:27:02.649

John Dawson: This is another opportunity to deliver a comment. If you have a comment

144

00:27:02.790 --> 00:27:08.659

John Dawson: on the draft order of approval, feel free to unmute yourself and deliver your comment. Now.

145

00:27:22.670 --> 00:27:26.029

KG: Hey, John, this is Kasia Grisbeck again. Can you hear me?

146

00:27:26.030 --> 00:27:27.309

John Dawson: Yes, I hear you.

147

00:27:27.310 --> 00:27:46.179

KG: Thank you again for the opportunity to to chat if nobody else is going to make a comment. I do just have a procedural question that I was hoping you could answer. I'm wondering how your agency is going to respond to these comments, and kind of to what extent and what the timeline is on this, just so that I can be on the lookout for it.

148

00:27:46.800 --> 00:27:55.370

John Dawson: Sure we will. Prepare our response to comments. The comment period ends on January 31.st

149

00:27:55.976 --> 00:28:12.190

John Dawson: After that we will write up a response to comments. Document, it'll be part of the engineering worksheet. One of the documents that was up for up on our website for comment was the engineering worksheet.

150

00:28:12.330 --> 00:28:21.439

John Dawson: We will add our response to comments to that document, and then we will send it out to

151

00:28:22.232 --> 00:28:25.759

John Dawson: we'll we'll send that we'll we'll put the the

152

00:28:26.440 --> 00:28:33.769

John Dawson: new response to comments on our website and send that out to our permit actions email list.

153

00:28:34.265 --> 00:28:47.029

John Dawson: We will also send it to everybody who submitted written comments cause that way. We have. Obviously, we have email addresses for everybody who submitted written comments so we'll we'll send out the

154

00:28:48.510 --> 00:28:53.570

John Dawson: the website link to everybody on our permit actions email list.

155

00:28:53.790 --> 00:28:59.909

John Dawson: And we'll also send a a direct response to everybody who submitted written comments as well.

156

00:29:00.070 --> 00:29:02.080

KG: Does that? Does that make sense?

157

00:29:02.080 --> 00:29:07.889

KG: It totally makes sense. Thank you for explaining that. I'm wondering what the anticipated turnaround is for the responses.

158

00:29:08.453 --> 00:29:19.109

John Dawson: It's very hard to say it, really. Because there's another week and a half of the comment period. It really depends very much on the amount of comments that we receive.

159

00:29:19.640 --> 00:29:20.200

KG: Sure. Okay.

160

00:29:20.200 --> 00:29:22.159

John Dawson: It's hard to hard to anticipate.

161

00:29:22.160 --> 00:29:24.110

KG: Okay, understood. Thank you.

162

00:29:44.990 --> 00:29:47.940

John Dawson: Are there any additional comments at this time?

163

00:30:05.360 --> 00:30:15.010

John Dawson: It appears there are no additional comments at this time, so we will go into one more break, and we will reconvene at 5, 55.

164

00:30:48.870 --> 00:30:51.719

John Dawson: Welcome back to the public. Hearing

165

00:30:52.000 --> 00:30:59.119

John Dawson: on proposed order of approval. Number 1, 1, 5, 7, 3 for Cedar Grove, Maple Valley.

166

00:31:00.890 --> 00:31:05.129

John Dawson: This is a last chance for oral comments

167

00:31:05.310 --> 00:31:12.810

John Dawson: at this hearing. If you'd like to deliver a comment, feel free to unmute yourself and speak.

168

00:31:54.320 --> 00:31:58.740

John Dawson: As I mentioned previously. We are also accepting written comments

169

00:31:58.870 --> 00:32:03.529

John Dawson: and written comments may be submitted to the email. Address.

170

00:32:03.710 --> 00:32:09.470

John Dawson: public comment@pscleanair.gov.

171

00:32:09.720 --> 00:32:15.290

John Dawson: And written comments are due by 4 30 pm. On January 31, st

172

00:32:16.610 --> 00:32:36.800

John Dawson: I'd also encourage you if you are not subscribed to the agency's Permit Actions email list or any of our other email lists. We have a a number of email lists that to which you can subscribe. And you can subscribe to them by going to our website, pscleanair.gov.

173

00:32:37.410 --> 00:32:47.750

John Dawson: and then at the top of the screen under the how do I menu each under sign up for choose email notifications.

174

00:32:48.410 --> 00:32:59.919

John Dawson: And one of the lists you can sign up for under email notifications is permit actions. We also have lists related to announcing air quality burn bans.

175

00:33:00.030 --> 00:33:09.240

John Dawson: grant programs. Other updates related to wildfire smoke regulation updates, we, we do have a number of email lists to which you can subscribe.

176

00:33:20.910 --> 00:33:26.579

John Dawson: We will keep this open until 6 o'clock, just in case there are any last minute comments.

177

00:34:57.330 --> 00:35:06.479

John Dawson: Thank you to all of our attendees. Thank you to all of our commenters. It's now 6 o'clock, and the hearing is now closed.
